

Taipan0 & Rattler8248

Specification

ATX Power Supply Input

2 x IDE Hard Disk Ports

1 x 32-bit PCI Port

2 x USB 2.0 Ports

1 x VGA Port

2 x PS/2 Keyboard/Mouse Ports

Audio Ports

Expansion Port from PPC Module

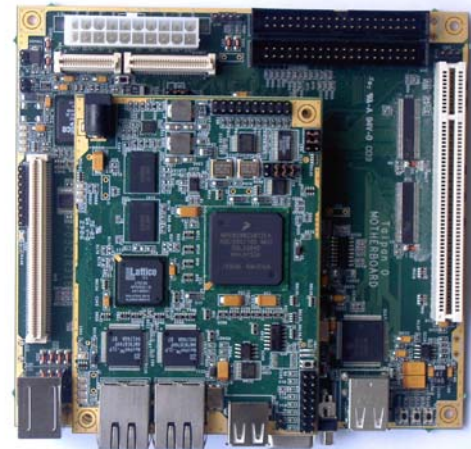

Standard Development Board:

The Taipan0 Motherboard accepts the Rattler8247/8248 module, and extends functionality to provide a stand-alone Linux development platform. The core processor is the MPC8247/8248 on the Rattler module, and together with the Taipan0 motherboard provides a powerful integrated Linux development platform. Available functionality includes 2x USB 2.0 host ports, video port for connection to monitor, keyboard/mouse ports, 2x hard disk ports and a PCI slot. The motherboard runs Fedora Core enabling native PPC development.

Custom Embedded Board:

For production volumes, the card can be fully customised to meet application requirements. A range of based cards are available, or a new version can be created as required. Each customised derivative is a COTS card, with the same warranty and support status as the existing standard card range.

Contact A&M to discuss the customisation service.
